Letter of Reference

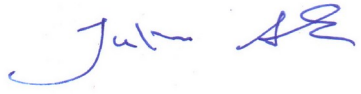
I am pleased to provide this letter of reference for Ms Aanchala Ravindra Bhongade, a final-year BTech student in Btech Production Engineering at the Veermata Jijabai Technological Institute (VJTI), Mumbai, India. Ms Bhongade participated in a data science research project under my supervision between 15 July 2024 and 15 January 2025. The project, which was carried out 100% remotely, focused on weak gravitational lensing and involved the analysis of simulated cosmological data.

Throughout the project, Ms Bhongade demonstrated a sound understanding of the assigned tasks and contributed to the documentation and analysis pipeline in a structured and diligent manner. She also curated a clear and technically accurate summary of the methodology and scientific objectives, reflecting an ability to engage with complex topics in data science and cosmology.

While our interactions were limited to online meetings and I cannot comment in depth on her broader academic abilities, I can attest that she showed a commendable degree of motivation and professional conduct throughout the project. Her performance appears consistent with expectations for a student at her academic stage.

I wish Ms Bhongade all the best in her future endeavours.

Yours faithfully



Prof. Dr. Julian Adamek
